DETAILED ACTION

Claim Rejections - 35 USC § 103

1. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

2. Claims 30-38, 41, 43, 58, 60-63 and 65-67 are rejected under 35 U.S.C. 103(a) as being unpatentable over Jones (U.S. 5,522,155) in view of Zingle et al. (U.S. 5,596,814). Jones teaches a container 1, 10 having a body 1 and a closure 10. The closure has a through going hole 14, with a hydrophobic membrane 30 secured to the inner end and an air tight seal closing the outer end.

Jones teaches the claimed invention except for the air tight seal being permanently attached. Zingle et al. teach that it is known to provide a container with an air tight seal which is permanently attached to the closure by a coating (see col. 5 lines 41-46). It would have been obvious to one having ordinary skill in the art at the time the invention was made to provide the container of Jones with the air tight seal being permanently attached to the closure by a coating, as taught by Zingle et al., in order to prevent venting once initial venting is complete.

Regarding claims 31, 61 and 67, Jones teaches the claimed invention except for the air tight seal terminating flush with the outer surface of the closure. Zingle et al. teach that it is known to provide a container with an air tight seal which terminates flush with the outer surface of the closure (see element 24 which is seated within element 22 of the closure). It would have been obvious to one having ordinary skill in the art at the time the invention was made to provide the container of Jones with the air tight seal

terminating flush with the outer surface of the closure, as taught by Zingle et al., in order to securely fasten the seal within the opening and prevent unintentional removal of the seal.

Regarding claim 37, it further would have been obvious to one having ordinary skill in the art at the time the invention was made to provide the container of Jones with the hole being between 50 and 100 microns, since such a modification would have involved a mere change in the size of a component. A change in size is generally recognized as being within the level of ordinary skill in the art. *In re Rose*, 105 USPQ 237 (CCPA 1955).

Allowable Subject Matter

3. Claims 39, 40, 42, 59, 64 and 68 are objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.

Response to Arguments

4. Applicant's arguments with respect to the claims have been considered but are moot in view of the new ground(s) of rejection. The new grounds of rejection were necessitated by the amendment filed September 10, 2007.

Conclusion

5. Applicant's amendment necessitated the new ground(s) of rejection presented in this Office action. Accordingly, **THIS ACTION IS MADE FINAL**. See MPEP § 706.07(a). Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

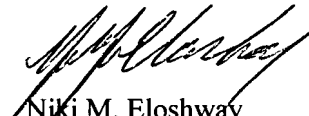

A shortened statutory period for reply to this final action is set to expire THREE MONTHS from the mailing date of this action. In the event a first reply is filed within TWO MONTHS of the mailing

date of this final action and the advisory action is not mailed until after the end of the THREE-MONTH shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the date of this final action.
